PROJECTS

Parkium | https://github.com/yaasir007/Parkium
The parking system project is a web application designed to simplify parking management using a combination of JavaScript, Rails, Ruby, Webpack, HTML, CSS, Bootstrap, SCSS, and Devise template.

RentMe | https://github.com/yaasir007/RentMe
The car renting project is a Ruby on Rails web application that enables users to rent cars for a specific period. The application features user authentication, car booking and payment processing. It provides a user-friendly interface for browsing available cars, checking their availability, and making a booking reservation.

Mortgage Calculator | https://github.com/yaasir007/mortgage-calculator
A mortgage calculator is a web application that allows users to estimate their monthly mortgage payment. It is typically used by potential home buyers to determine how much they can afford to borrow. A mortgage calculator can be built using React JS, a popular JavaScript framework and Material UI.

Recipe Scrapper | https://github.com/yaasir007/recipe-scrapper
The recipe web scraper project is a Ruby-based program that scrapes recipe websites for ingredients and instructions, storing them in CSV format. The program automates the process of manually copying recipes, making it easier for users to collect and organize recipes. The CSV format makes it simple to view and sort recipes in a spreadsheet program.

Smart Online Parking System | https://github.com/yaasir007/SOPS
The parking system web application is a comprehensive solution designed to simplify the parking process. The application is built using HTML, CSS, Bootstrap, jQuery, Font Awesome, and PHP. It offers an intuitive user interface that allows users to quickly find and reserve parking spots. With also a credit system for the payment method.
